

# ***Mark Four Ltd***

## **ENERGY POLICY**

### **Declaration of the intention**

MARK FOUR Ltd is committed to effective energy management. It is intended that energy efficiency will become an integral part of the facility operation. The company intends to take a lead role, driving energy efficiency and reducing environmental impact for the benefit of our Site and for our employees.

### **Policy**

The policy is to control energy consumption in order to:

- Minimise unnecessary energy expenditures
- Improve comfort and conditions
- Reduce the environment impact and make a significant environmental contribution
- Set an example within the printing and binding sector

### **Strategic objectives**

- Utilise fuel and electricity as efficiently as possible

### **Management objectives**

- Invest in energy saving measures that will offer the smallest life cycle energy impact and best investment
- Establish a management structure capable of securing and maintaining our energy and environmental objectives
- Secure the input and assistance of staff at all levels in order to initiate and support energy saving initiatives

### **Initial Targets**

To achieve 2% energy saving and reduction in carbon dioxide emissions each year, for the next 10 years through improved housekeeping.
